

HISTORY

Mize Machine Inc. was established in 2001 by Craig Mize and located in Hopkinsville, Kentucky.

MMI started as a small machine shop catering to agricultural needs. Now MMI, through the reputation of quality, provides parts and service to manufacturing, automotive, and agriculture in five states. With experienced leadership, skilled machinist, and modern machining technologies, MMI has become your full service source.

CAPABILITIES

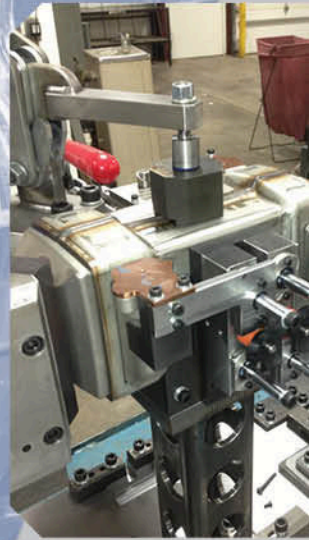

Specializing in precision-machine parts, we perform many types of manufacturing processes. MMI utilizes the latest version of CAD and 3D drawing software to perform 3D design and machining with multiple CNC machining centers and lathes. MMI can produce complex parts to the tightest of tolerances. MMI is also your source for mold and die, jigs, fixtures, production parts, or just simply one offs or repair. We also offer expedite service when time is critical.

With a 28,000 sq. ft. facility MMI has a wide array of the latest technology in machining centers, lathes, wire EMSs and EDM sinker brand names such as Haas, Hurco, Hardinge Bridgeport, Ameri-Seiki, Okuma, Romi, and Sodick. MMI also has a wide variety of manual equipment including surface and rotary grinding. MMI also provides fabrication using Miller welders.

“Your Complete Source for Quality Machine Work”
